

March 14 2016

I was having trouble with the fit on my Beretta DT10. The President of the Galt Sportsman Club referred me to Artisan Stock and Gun Works in Niagara Falls, Ontario.

I met with Ethan and Roger Stenski. They showed me some of their work and I was impressed.

The process of choosing the wood, reviewing my somewhat awkward shooting style, taking numerous measurements, building and modifying a prototype took a few months. In all this time, they did not attempt to change the way I shoot. They built the prototype to fit me.

When we were all satisfied, work commenced on the real thing. The final result is fabulous -- both in looks and scores.

I now have a beautiful looking gun that shoots like a dream with zero felt recoil and is wonderfully effective.

Thanks Guys.
